I remember one time I was working with a mobile project and it was already deployed to the client. It work out well from planning, development, testing to deployment but after a while the client was clamoring that the app is getting slower and slower when it was continuously being used up to the point where it will just crash suddenly.

Host your SharePoint sites cost effectively. Pay-as-you-go pricing and per-minute billing from Azure helps you save money. For development and testing, take advantage of Azure benefits for Visual Studio subscribers to reduce software licensing costs. When testing, spin up additional servers as needed for scale and load testing over short periods of time and remove them when you're finished.
