Lampire Biological Products: Trade Shows Schedule

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

We all know that people look different. Anyone can tell a Czech from a Chinese. But are these differences racial?

RACE - The Power of an Illusion . What Is Race | PBS

ENDNOTES. 1 I first proposed and defended the interaction approach for humans in the 1960s. At this time it was generally believed that orientation and identity were solely products of the environment and upbringing (Diamond 1965, 1968, 1995b). Since then I have presented this view many times from different perspectives; see the References for details.

Title: Biological Aspects of Sexual Orientation and Identity

The Christian church's record on teaching sexual morality is patchy. While Jesus taught the indissolubility and exclusivity of marriage, quite early in Christian history some Church leaders began to show a distaste for sexual intercourse which has had damaging results.
