Chiropractic Technique Self Adjustment Made

Chiropractic is a form of alternative medicine mostly concerned with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. Some proponents, especially those in the field's early history, have claimed that such disorders affect general health via the nervous system, through vertebral subluxation, claims which are not based on scientific evidence.

When a hands-on spinal adjustment used to correct a putative vertebral subluxation (as a treatment for back pain or a health problem) cannot be done because of complicating factors (such as osteoporosis) or provider disability, an adjusting instrument might be used to satisfy the demand for an "adjustment." Some subluxation-based chiropractors use adjusting instruments exclusively ...

In chiropractic, a vertebral subluxation is a purported misalignment of the spinal column, not necessarily visible on X-rays..It has no biomedical basis, lacks clinical meaningfulness, and is categorized as pseudoscientific.. Straight chiropractors continue to follow Palmer's vitalistic tradition, claiming that subluxation has considerable health effects and also adding a visceral component to ...

Vertebral subluxation - Wikipedia

What it is: The Alexander Technique is a physical method of retraining the body to “unlearn” negative physical habits and patterns of movement in order to allow the body to move more freely and naturally.The technique can be learned from an accredited teacher, by attending an in-person course, or it can be self-studied. Basically it allows you to identify tension patterns that are ...
