Logistics is generally the detailed organization and implementation of a complex operation. In a general business sense, logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The resources managed in logistics may include tangible goods such as materials, equipment, and supplies, as ...

INTRODUCTION — The management of anticoagulation in patients undergoing surgical procedures is challenging because interrupting anticoagulation for a procedure transiently increases the risk of thromboembolism. At the same time, surgery and invasive procedures have associated bleeding risks that are increased by the anticoagulant(s) administered for thromboembolism prevention.

According to a recent article by CMA partner Credit Today, a survey of the participants in Industry Credit Groups throughout the United States (including some CMA members) explained that their overall investment of under \$2,000 per year in an industry credit group returns over \$250,000 in cost savings (yes; you read that correctly). That's an investment that is hard to pass up.
